

`anvector::pop_back`

```
graph LR; A[anvector::pop_back] --> B[anvector::empty]
```

A diagram showing a transition from a function call to a state. On the left, a gray rectangular box contains the text `anvector::pop_back`. A blue arrow points from the right side of this box to the left side of a white rectangular box on the right. The white box contains the text `anvector::empty`. Both boxes have a thin black border.

`anvector::empty`
